[Icons](#)

GENIUS also allows to get icons instead of buttons with label:

- It can be done using the [GButton](#) class with a specific constructor taking a [GIcon](#) object as an argument
- It also applies to [GExecButton](#)

GENIUS proposes standard icons (included into the genius.jar file) via the [GIcon](#) class. The following icons are available:

- CLEAR
- COLLAPSE
- DELETE
- ERROR
- EXIT
- EXPAND
- INFO
- OPEN
- PRINT
- SAVE
- START
- STOP
- WARNING

```
butLoad  = new GButton("Load", new GIcon (GIcon.Type.OPEN, 24)); // Size =
24 pixels
butWrite = new GButton("Write", new GIcon (GIcon. Type.SAVE, 24));
butClear = new GButton("Clear", new GIcon (GIcon. Type.CLEAR, 24));
butQuit  = new GButton("Quit", new GIcon (GIcon. Type.EXIT, 24));

cmd = new GJavaCommandLauncher( ... );
// Icons change automatically when launch/stop
cmd.setButtonIcons(new GIcon(GIcon.Type.START, 24), new
GIcon(GIcon.Type.STOP, 24));

// Specific icon
butAppli = new GButton("Appli", String absoluteOrRelativePath);
```
