[Main differences between V1.6.1 and V1.6.2](#)

The identified bugs on the V1.6.1 have been corrected:

- Now, the JVM will no more continue to run after exiting a GENIUS application when using the GStandardApplication widget.
- It is now possible to read a MADONA XML formatted files as the absolute path of the file contains some blank characters.
- In GStandardApplication, texts are always added at the end of console areas.
